The M.B.A. program equips new graduates with the knowledge, skills and perspectives necessary to lead in the evolving business environment.
Why choose Texas State?
The full-time cohort program streamlines graduate studies for those who wish to complete their M.B.A. in a cohort-based format. With some afternoon and mostly evening classes, the 42-hour program spans just 21 months. The full-time cohort M.B.A. program is offered exclusively at the San Marcos campus.

The M.B.A. program touts a diverse student population due to the curriculum design, which equips business and non-business majors with a fundamental skill set without requiring prerequisite or leveling courses.

Course Work
The Texas State full-time cohort M.B.A. program provides the knowledge and tools needed for a successful career in the management of organizations. Key elements of the program include a high degree of curriculum integration and a strong focus on professional development. For the first semester of the program, separate sections of the Tier I classes are designated for that year’s entering cohort. During the summer session, students are required to participate in an internship. In addition, the full-time cohort has a required study abroad experience in the final semester of the program.
Department Mission

The McCoy College of Business Administration fosters an engaged learning community that prepares a diverse student population for successful business careers as responsible global citizens. The College complements these efforts with research that adds to knowledge, provides solutions to business challenges and contributes to pedagogical advances. As a result, all McCoy College programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB). Less than 5% of the schools worldwide granting business degrees have earned AACSB accreditation.

The McCoy College of Business Administration strives to continue to lead in experiential business education and business-relevant, socially significant research.
Faculty
The McCoy College faculty aspires to create value through business-relevant and socially significant research. The intellectual contributions produced by faculty members add to knowledge about business practices, provide solutions to business challenges and contribute toward understanding and improving the relationship between business and society. McCoy graduate students often have the opportunity to work with faculty on research through course work and several graduate research assistantships offered by the College.

Career Options
In addition to a portfolio of quantitative skills, a McCoy M.B.A. student will acquire practical management and leadership skills. These skills are transferable to any industry including technology, healthcare, manufacturing, financial services, consumer products and nonprofits. McCoy M.B.A. graduates have embarked on career paths at a variety of firms including Apple, Applied Materials, Dell, Frost Bank, H-E-B and IBM.
How to Apply
