Students learn theories and real-world problem solving skills focused around managing instructional personnel in an educational or training environment.
Texas State University, to the extent not in conflict with federal or state law, prohibits discrimination or harassment on the basis of race, color, national origin, age, sex, religion, disability, veterans’ status, sexual orientation, gender identity or expression.

Course Work
In this program, students develop instructional and managerial competencies through various courses in curriculum design and delivery, instructional improvement, human performance technology, class organization, management, teaching/learning styles, diversity, understanding organizations and program evaluation.

Course schedules are flexible to accommodate the needs of working professionals, located on campus in San Marcos, Round Rock or online. Many hybrid classes allow students to complete work online and attend face-to-face classes, allowing for personal and professional interaction.

Students provide direct input to create their 36-credit-hour degree plans during meetings with the graduate advisor. Students must pass both the exit written and oral examinations prior to receiving their degrees.

Why choose Texas State?
The master of education (M.Ed.) in management of technical education program prepares graduates to manage instructional personnel in an educational or training environment. Graduates learn skills needed to supervise educators or trainers in junior colleges, businesses, the military, civil service or other education and training sites.

Working professionals are able to customize their degree plans in order to gain practical and theoretical knowledge and take courses to accommodate their schedules.
Department Mission

The management of technical education M.Ed. degree provides the broad skills necessary for an educator or trainer to become a better instructor and manager of instruction in career and technical education or training settings. Students can hone their technical education and administrative skills through courses in career and technical education. These courses include methods of teaching and training, the professions of teaching and training, and human relations. Students have the option to include courses in the area of educational leadership or explore courses in occupational education as part of the program.
Faculty
The program faculty include individuals with a variety of backgrounds, specializing in teaching adult students who are working professionals. They are established scholars in leadership, adult learning, organization development and online learning. All are trained in advanced teaching modalities for graduate courses, whether they are online or hybrid. Several have won prestigious awards for their teaching and other faculty work.

Career Options
Upon graduation, students will be prepared for many career fields including:

» organizational effectiveness
» organizational development
» teaching in junior colleges
» teaching in K-12 career and technical education
» supervision and management of instruction
» training and development
» corporate training
