Program Description

The program's strength lies in the number of mathematics courses required to supplement courses in the teaching and learning of mathematics. This substantial number of mathematics core courses, coupled with the mathematics education specialization, increases graduates' employment opportunities and scholarly productivity.

The doctorate is designed for individuals whose career goals will take them into professional leadership roles in mathematics education. Graduates will be prepared for positions on the mathematics faculties of colleges and universities; as decision-makers in state or local education agencies; as researchers in think tanks, corporations or nonprofit agencies; as high-ranking staff members of foundations or organizations; or as decision-makers within a national ministry of education.

Texas State's Department of Mathematics provides an environment at the forefront of research that produces graduates who will contribute to making Texas a leader in mathematics, science and technology. Students learn to think critically, communicate mathematical concepts effectively and become lifetime learners.
