Nurse practitioners are in greater demand than ever before. As primary care providers, they make a difference in the quality of life of each patient. Texas and the U.S. have a shortage of primary care providers, while the number of graduating physicians who choose to enter primary care drops each year. Family nurse practitioner programs will add thousands of primary care providers to meet Texans’ needs in the years to come.

Students who earn an MSN degree become eligible for certification as a family nurse practitioner and licensure as an advanced practice registered nurse.

Graduates are qualified to sit for one or more of the following national certification examinations:

- American Nurses Credentialing Center (ANCC) Certification Exam (FNP)
- American Academy of Nurse Practitioners (AANP) Certification Exam (FNP)
Course Work
Course work takes place online, with a few face-to-face weekend meetings at the St. David's School of Nursing in Round Rock, Texas. During these weekend intensives, students hone their skills with faculty and get to know their fellow FNP students. Of the required 48 credit hours, 11 are in practicum courses, during which students learn one-on-one from a preceptor in their area.

Curriculum

- Advanced Pharmacotherapeutics
- Advanced Pathophysiology
- Advanced Health Assessment*
- Fundamentals of Appraisal and Translational Research I, II, III
- Behavioral Health Primary Care
- Adult/Gerontology Primary Care*
- Reproductive, Sexual and Obstetrical Health*
- Pediatric and Adolescent Primary Care*
- Healthcare Leadership for a Changing World
- Theoretical Foundations of Advanced Integrative Nursing
- Integrative Family Primary Care*
- Current Issues in Advanced Practice Nursing

*Indicates companion clinical component

Outcomes
In addition to gaining the knowledge and skills to assess patient health, promote wellness and treat conditions in patients from diverse populations, graduates practice the theory and techniques of integrative healthcare. Students study how the interrelationship of body and mind impacts how we heal ourselves and others. They learn reflective practices (mindfulness, meditation techniques, nutrition as medicine), as well as evidence-based complementary therapies, such as how regular qi gong practice positively impacts cancer within the context of traditional treatments. Students also become familiar with Eastern medicine and cognitive/behavioral interventions. These skills empower students to serve at the vanguard of leadership management and organizational development and enact wellness-focused healthcare reform.

The MSN graduate will:
- integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations
- incorporate current and emerging genetic/genomic evidence as well as biopsychosocial paradigms in providing advanced nursing care to individuals, families and communities while accounting for patient values and clinical judgment
- design nursing care for a clinical or community-focused population based on biopsychosocial, public health, nursing and organizational sciences
- evaluate the nutritional, vitamin, supplemental and herbal interventions in individuals, groups and communities
- apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
- synthesize evidence for practice to determine appropriate application of interventions across diverse populations
- use quality processes and improvement science to evaluate care and ensure patient safety for individuals and communities
- integrate organizational science and informatics to make changes in the care environment to improve health outcomes
- analyze nursing history to expand thinking and provide a sense of professional heritage and identity
- synthesize integrative practices based on biopsychoneurological scientific underpinnings, cognitive neuroscience and psychoneuroimmunology

Admission Policy
Requirements for admission to the MSN program:
- an application for the family nurse practitioner program submitted via the ApplyTexas website, including application fee.
- bachelor of science in nursing degree from a nationally accredited nursing program. Degree must be reflected on transcript at the time of application.
- minimum cumulative GPA of 3.0 on a 4.0 scale in nursing courses from an accredited college or university
- a minimum cumulative GPA of 3.0 on a 4.0 scale during the last 60 hours of course work (undergraduate/graduate/professional) at an accredited college or university
- completion of an undergraduate course in statistics with a grade of C or higher. Course must be completed at the time of application and reflected on submitted transcripts.
- completion of the online departmental application
- current, unencumbered RN licensure in Texas or other state in which the student will complete clinical courses. Submit printed license from the state Board of Nursing website.
- equivalent of one year experience as a RN prior to the application deadline for the MSN-FNP program
- three forms are required from professionals competent to assess the applicant's academic capability and interest in pursuing a career as an FNP
- statement of purpose to persuade the admission committee that you are a highly qualified applicant and that they should select you for admission to the St. David's School of Nursing MSN-FNP program

Note: Due to variation in the laws of states and regulations of state boards of nursing, our ability to offer admission to non-Texas residents may be limited.

Visit www.gradcollege.txstate.edu/apply for access to the ApplyTexas website, application information and additional details. Transcripts must be mailed directly to The Graduate College from the university or college attended or submitted in a sealed university envelope with the university registrar's signature on the back of the envelope. The family nurse practitioner program does not require a Graduate Record Exam (GRE) score. Please submit required admission documents to The Graduate College.

Mailing Address
Texas State University
The Graduate College
601 University Drive
San Marcos, TX 78666-4684

For complete application steps or to electronically submit admission documents to The Graduate College, please go to The Graduate College website: www.gradcollege.txstate.edu/nurs. The fall semester application deadline for the FNP program is April 1. Please note that the program admission priority deadline of February 15 must be met in order to be considered for scholarships, fellowships and assistantships.
